

Summary

Highly accomplished Full Stack Developer and Technical Leader with over 10 years of experience in designing, launching, and scaling robust web and mobile applications across various sectors, including AI-driven platforms. Proven ability to translate complex technical requirements into strategic business solutions, resulting in up to **200% revenue growth** and **10x process acceleration**. Expertise in **API concepts, system integrations, technical documentation**, and leading high-performance development teams.

Experiences

Founder / CTO | *Algoritama* | Yogyakarta, Indonesia Dec 25 - Present

- **Improved** admission speed by 100%, increasing client leads and revenue potential by **designing and developing** a school admission portal and admin dashboard (NextJS & Supabase).
- **Migrated and redesigned** a school website from Wordpress to Astro static site with headless WP as CMS. Making the **landing page 2x faster** with beautiful modern design.

Senior Software Engineer / Frontend Tech Lead | *Jakpat* | Yogyakarta, Indonesia Mar 22 - Nov 25

- **Designed and implemented** a complex crosstab tool in a new React/NextJS dashboard to **streamline data processing workflows, accelerating business processes by 10x**. This boosted client handling capacity and revenue, directly supporting the mission to help companies save time and scale operations.
- **Collaborated with Product & Project teams** on new feature development, maintaining a **70% test coverage** to ensure solution feasibility, responsiveness, and stability across applications.
- **Led and mentored** a team of 5 frontend developers, fostering a culture of continuous improvement and providing technical guidance to ensure integration readiness; **enabling two team members to achieve promotions**.
- **Maintained** iOS and Android applications built with React Native, serving thousands of users monthly on a critical mobile platform.

Full Stack Developer | *Foresight* | Nottingham, United Kingdom Oct 17 - Mar 22

- **Drove a 200% revenue increase** by **designing and launching** a new web application (Laravel, Vue, PostgreSQL), transforming it from concept to production-ready product to meet evolving client needs.
- **Guided and mentored** two junior developers, **preparing one for a senior role** through tailored training in best practices and coding standards, ensuring smooth project continuity.

iOS Developer | *Qiscus* | Yogyakarta, Indonesia Oct 15 - Dec 16

- **Developed** the Qiscus iOS chat SDK (Swift, Objective-C), which **enabled seamless communication** for major Indonesian companies.
- **Trained** 3 iOS developers transitioning from other platforms, **accelerating their learning curve** and supporting the team's growing project demands.

IT Manager | *Poltracking* | Jakarta, Indonesia Oct 14 - Oct 15

- **Designed and launched** Poltracking's **first app version** (Laravel, jQuery), empowering the team to **transform raw survey data into a public dashboard** featured on national TV, **increasing brand visibility**.

Co-founder | *Recomine* | Yogyakarta, Indonesia June 13 - Oct 14

- **Co-founded** Recomine, a **social recommendation startup**, securing **initial investment** from Indigo Incubator and **spearheading early-stage development** (Go) and product-market fit exploration.

iOS Developer | *Suitmedia* | Bandung, Indonesia 2012 - 2013

Operations Manager | *Rumah Wirausaha* | Jakarta, Indonesia 2011 - 2012

iOS Developer | *Zahir International* | Jakarta, Indonesia 2010 - 2011

Junior Content Writer | *Detikcom* | Yogyakarta, Indonesia 2009 - 2010

IT Teacher | *SDIT Baitussalam* | Yogyakarta, Indonesia 2008 - 2009

Educations

- **B.Sc. Computer Science** | *Universitas Gadjah Mada* | Indonesia 2004-2013
- **Data Science and Business Intelligence** | *Pacmann* | Indonesia 2022
- **Public Speaking** | *Dialogika* | Indonesia 2026

Skills

Portfolios

- **Algoritama** | algoritama.com : a modern company website for a Yogyakarta-based software house focused on human-plus-AI engineering services. Built with Astro and Tailwind CSS, it emphasizes speed, responsive design, and a polished editorial experience through a bilingual English/Indonesian blog. The site presents core offerings in product engineering, system refactoring, and automation, supported by case-study style outcomes and technical insights.
- **PSB Balqis Jogja** | psb.balqisjogja.com : a web-based student admissions platform for Balqis Jogja, built to handle registration, payment submission, and application status tracking end to end. Built with Next.js, TypeScript, and Supabase, it combines a public-facing enrollment flow with authenticated admin tools for reviewing applicants and managing admissions data. The system streamlines school intake operations through multi-step forms, document handling, status updates, and exportable registration records.
- **BSMI** | bsmi.or.id : a multilingual humanitarian organization website built to present campaigns, news, galleries, and institutional information for Bulan Sabit Merah Indonesia. Built with Astro and Cloudflare Pages, it combines a fast static frontend with serverless APIs, D1-backed content storage, and a lightweight admin panel for managing published posts. The project also includes a structured blog archive and category-based content system that supports ongoing editorial publishing for disaster response, health programs, and international aid campaigns.
- **Ummu Habibah** | ummuhabibah.com : a school and pesantren website that presents institutional profiles, student life, Islamic learning programs, and new student admissions content for a Muslimah-focused education community. Built with Astro and integrated with a WordPress backend via the REST API, it combines a fast frontend with dynamically sourced pages, articles, categories, and profile content. The site supports content publishing and discovery across school information, santri activities, religious articles, and admission announcements in a clean, structured editorial experience.
- **Pagi Petang** | pagipetang.id : a Kotlin Multiplatform Islamic remembrance app that delivers morning and evening dzikir in a calm, distraction-free reading experience across Android, iOS, and web. Built with shared Compose Multiplatform UI and domain logic, it preserves Arabic-first presentation while handling period switching, progress persistence, and cross-platform state consistency from a single codebase. The app pairs immersive visual design with tested controller and repository layers, making it a production-oriented spiritual utility rather than a simple content viewer.
- **Kelas Quranic Arabic** | kelas.quranicarabic.id : a web-based teaching platform for Quranic Arabic instructors to manage courses, classes, students, and learning materials in one system. Built with React, TypeScript, Express, and Drizzle ORM, it combines role-based admin workflows with Google authentication, class enrollment management, and structured content delivery for teachers and students. The platform also supports PDF-centric teaching through secure storage, optimized file delivery, annotation/presentation tools, and multilingual UI for a more practical digital classroom experience.
- **Hanief Utama** | haniefutama.com : a personal website and writing platform that presents essays, project notes, and professional identity through a distinctive command-center inspired interface. Built with Jekyll, custom SCSS, and lightweight JavaScript, it combines static publishing reliability with interactive touches such as keyboard shortcuts, command navigation, and theme switching. The site functions as both portfolio and publishing archive, organizing projects and long-form writing into a cohesive, highly personalized developer brand experience.
- **Mifta Rachman** | miftarachman.com : a static academic profile website built to present a researcher's background, publications, teaching work, and professional collaborations in a clear public-facing format. Built with semantic HTML and custom CSS, it delivers a responsive, accessible, and SEO-friendly single-page experience without requiring a build pipeline or CMS. The site is structured to support scholarly visibility through publication lists, academic metrics, research focus summaries, and direct links to institutional and research profiles.
